## FOREWORD

# Explore the fifth season!

There are predictions the inflation will keep rising under the year ahead to dive to normal stable circumstances in 2024, just in time for this collection to reach the stores. With this in mind we want to create and hold on to the feeling, now more than ever; that we go towards brighter times.

When creating the Spring/Summer Season 24 collection we took inspiration from the outdoor life, from the day to day life and from the lifestyle of people around us.

In our designs you will find pieces that are waterproof, breathable and windproof. Everything created for an active life outside. The clothes are durable for use when you are out walking, hiking, sailing, going to work or taking an evening stroll, always feeling comfortable.

Join us on the journey to explore your fifth season!

Erik Johansson, CEO

# Our responsibility

The seasons changes everywhere around the world. Climate is getting warmer with more extreme weather and winters becomes shorter. It is our responsibility to strive for a better future for the next generations. We always want to make active choices regarding reducing our carbon footprint.

We take pride in always offer high quality to a fair price, without making ethically or environmentally insensitive decisions. We work effectively with our suppliers on a daily basis to source and develop our materials, fillings and surface treatments that both nature and people feel good about. This is what we do today - what we strive to make better for tomorrow; for a sustainable future.

*The world's leading recycled fiber is made for the good of tomorrow.*

Let's introduce REPREEVE, a material made from recycled plastic and pet-bottles. Several of SS24 key garments have been developed with extra consideration for the environment, something that both we at Five Seasons and our consumers value highly.

*"Billions of plastic bottles go into landfills every year. REPREEVE is the leading, most trusted, branded performance fiber made from recycled materials (including plastic bottles). REPREEVE transforms recycled bottles into amazing fibers, used by the world's leading brands to make athletic and fashion apparel and more. The process embeds properties like wicking, adaptive warming and cooling, water repellency, and more at the fiber level. For reliable, durable quality."*

*Fluorine-Free Water Repellent Textile Finishes For Ultimate Performance.*

Many of our outerwear are impregnated with Rudolf Bionic Finish Eco, which is a water and dirt-repellent organic treatment that is environmentally friendly and free of added perfluorinated substances (PFC).

*"Mother Nature designed many ways to benefit of water and to be sheltered from it. Many engineering challenges humans face can be solved by using natural design as a springboard. That's bionics. BIONIC-FINISH® ECO is Mother Nature's work reproduced on textiles and apparel to protect us from water. To perform"*

*Reduce harmful impact of production to people and the environment.*

All our recycled materials are certified with GRS (Global Recycled Standard) which is a certificate for recycled materials. This means that the production / product is tested for chemicals / heavy metals. What is recycled can be PET bottles or textiles or a mixture.

*"The Recycled Claim Standard (RCS) and Global Recycled Standard (GRS) are international, voluntary standards that set requirements for third-party certification of recycled input and chain of custody. The shared goal of the standards is to increase the use of recycled materials. The GRS includes additional criteria for social and environmental processing requirements and chemical restrictions."*

*A professional, third party certification body audits each stage in the supply chain.*

All our down garments are certified with RDS-Down to ensure the highest possible extent that down and feathers do not come from animals in a supply chain that have been subjected to any unnecessary harm.

*"The Responsible Down Standard (RDS) aims to ensure that down and feathers come from animals that have not been subjected to any unnecessary harm. It is our hope that the standard can be used to reward and influence the down and feather industry to incentivize practices that respect the humane treatment of ducks and geese. We believe that education - through the RDS - is a meaningful."*

OUTDOOR

It's in our nature to be outdoors, embrace it!

You should feel comfortable to be out in nature, therefore we have adapted our OUTDOOR collection to our customers' high requirements and lifestyle. We strive for comfort and high quality that won't disappoint in your active outdoor life!
